

VitaLab 

SYNLAB 

NEW!
**Our blood collection
station opened!**

With launching our new service we provide a unique product in the field of diagnostics and laboratory testing. Thanks to the professional background of SYNLAB and its nationwide coverage, we guarantee the most accurate results for our guests.

Our chemical, genetic and molecular diagnostic tests, as well immunology and microbiology testing services may be requested without any referral or long waiting periods. Results are quick and easy to access.

Beyond diagnostics we offer personalised consultancy

Concerning certain packages we have an opportunity in our hotel for personalised consultancies, based on the laboratory test results. The service is available both for hotel guests and other patients on regular blood collection days on Mondays and Thursdays, between 7:00 a.m. and 10:30 a.m. Upon request we can send the lab results to our patients in email.

Diagnostic packages

1. Basic screening package for Osteoporosis

11 900 HUF

Osteoporosis is one of the most common civilization diseases of our time. We recommend for all generations to regularly check the health status of their bone metabolism, the best means for which is our basic screening package for Osteoporosis.

Contents of the package: total PSA, Luteinizing hormone (LH), total testosterone, uric acid, creatinine + eGFR, urea

Completion date: 1-5 working days

8. Food intolerance testing IgG (for 46 nutrients)

23 000 HUF

Based on statistics 60% of the population show hypersensitivity and / or intolerance to one of the dietary ingredients. The appearance of the hypersensitivity reaction is diverse, often causing non-specific health problems. These include a variety of skin lesions, rashes, intestinal complaints and migraines. If the classic nutritive allergy panel is negative (where a food-specific IgE measurement is carried out), and clinical symptoms are also present, it is also recommended to perform a food-specific IgG test-panel.

Completion date: 10 working days

9. Food intolerance testing IgG (for 221 nutrients)

58 000 HUF

One of the most complex examinations in the field of food intolerance available today is the intolerance-panel test for 221 nutrients, which gives a comprehensive knowledge on the relation of your system concerning nutrients.

Completion date: 10-15 working days

Appointment: ☎ +36 83/501-140

10. Allergy panel tests

IgE – inhalational 40

11 900 HUF

Are you tormented by itchy red eyes every spring when the trees bloom? You are most likely to suffer from pollen allergy, so we recommend you to find out what causes your uncomfortable symptoms. The inhaled allergens can cause not only pulmonary, but also skin symptoms. The IgE antibody plays a role in allergic reactions like asthma, pollen allergy and atopic dermatitis (eczema), since the body of those suffering from allergy produces various allergen-specific antibodies (IgE-s) against allergens like pollens, mites, animal hair, etc. These antibodies react with the allergens and mast cells of the mucosa, resulting in release of histamine, which causes the uncomfortable allergic symptoms.

Completion date: 5-10 working days

11. Allergy panel tests

IgE – Nutritional 40

11 900 HUF

This is a classic food-allergy test, which consist of 40 allergens, those in cow's milk, wheat flour, fruits and oil seeds.

Completion date: 5-10 working days

12. Package for the screening of the thyroid gland

11 900 HUF

The most common endocrine disorder amongst the population affects the thyroid gland.

The thyroid gland can be examined quickly and easily. Screenings can reveal the disorders before the complaints have been developed.

Contents of the package: free fraction of T3 (FT3), free fraction of T4 (FT4), thyroglobulin, total testosterone, TSH

Completion date: 1-5 working days

For the accuracy and reliability of your results, please always comply with the instructions concerning the examinations! The blood test must always be carried out on an empty stomach, after the intake of a sufficient amount of fluid (approx. 0.5 litres), primarily water. Please avoid consuming coffee, tea and drinks with sugar-content before the blood test!
